

Assignment 16

You have two screenshots for this assignment.

1. The first will depict a specific layout of JPanels and JButtons within a JFrame, which you must replicate using JFrame, JPanel, and JButtons. Your goal is to achieve an identical visual pattern and layout as shown in the provided screenshot. This task is **mandatory**.

2. The second screenshot will present a similar visual pattern but with different arrangements of components. This serves as a **bonus** challenge. Your objective remains the same: recreate this layout using the same components (JFrame, JPanel, and JButtons), employing different layout managers. This bonus challenge encourages you to adapt your understanding of layout managers to achieve diverse visual designs.
